Industry Investment Opportunities

The Democratic Republic of the Congo (DRC) represents a prime opportunity for investors in industrial enterprises. An emerging economy with strong GDP growth, low inflation, and a balanced budget, the DRC also possesses:

- An abundant labor force
- Diverse raw materials (wood, oil, minerals, quartz)
- A market of over 70 million potential consumers
- 80 million hectares of arable land
- Major hydroelectric projects that will ensure the steady supply of affordable and reliable energy

The DRC's Vision for Industry

Industry is one of the DRC Government's top priorities. In its vision for the future of industrial development, the Government called for a balanced deployment of economic and industrial growth policies. This approach relies on the ability to develop processing and manufacturing industries, especially in the agro-industrial sectors, the enhancement of natural resources and the industrialization of the overall economy. The Government's development strategy for the industrial sector will be aided by the creation of Special Economic Zones (SEZ), agro-industrial parks and growth poles.

Ongoing Industrial Projects

- Special Economic Zone of Maluku
- Pool project at Kimpese: World Bank initiative financing the development of agriculture and road infrastructure, which will benefit 48 million farmers in Bas-Congo
- Agro-industrial park of BUKANGA LONZO
